

HARNEET K. PHUL

917-207-2960 | harneetkaur148@gmail.com

PROFESSIONAL SUMMARY

Software engineer with 14+ years of experience in test automation, data validation, and large-scale system integration, now pivoting into AI/ML engineering. Skilled in Python, TensorFlow, and NLP pipelines, with hands-on training in deep learning, generative AI, and prompt engineering. Strong foundation in building automated frameworks, analyzing complex datasets, and deploying quality-driven solutions in Agile environments. Azure AI Engineer Associate certified.

TECHNICAL SKILLS

AI / ML:	TensorFlow, NLP, Deep Learning, Generative AI, Prompt Engineering, LLMs	Languages:	Python, Java, SQL, XSLT
Cloud / DevOps:	Azure AI Services, Google Cloud AI, Jenkins CI/CD	Automation:	Selenium WebDriver, BDD/Cucumber, REST API Testing
Data / Tools:	TOAD, SQL Databases, SOAP/REST, JIRA, Git	Methodologies:	Agile/Scrum, Test-Driven Development, CI/CD

AI & ENGINEERING CERTIFICATIONS

- ▶ Azure AI Engineer Associate (AI-102)
 - ▶ Google Cloud – Generative AI
 - ▶ Generative AI Prompt Engineering
 - ▶ Python Automation & Testing
- ▶ Machine Learning Specialization – DeepLearning.AI (Coursera)
 - ▶ TensorFlow & NLP Fundamentals
 - ▶ Deep Learning Essentials
 - ▶ BDD – Cucumber Essentials

PROFESSIONAL EXPERIENCE

QA Consultant – AI & Automation Focus

Oct 2018 – Present

First Derivatives, Mississauga ON / New York, USA

- ▶ Designed and implemented automated test suites and data-driven frameworks using Python and Selenium, reducing manual test effort by 60%
- ▶ Built API test strategies for complex energy-sector systems (IESO), validating data integrity across scheduling, dispatch, and contract modules
- ▶ Authored automation scripts processing large datasets for regression and integration testing, establishing repeatable data pipelines
- ▶ Led Agile ceremonies and cross-functional collaboration, driving quality metrics analysis and continuous process improvement

Sr. Software Quality Engineer

Dec 2013 – Sep 2018

Rogers Communications, Toronto, ON

- ▶ Engineered automated testing solutions with Selenium-Java and HP QTP, executing data validation across multi-tier e-commerce platforms
- ▶ Built test data repositories and SQL-based validation pipelines for system and integration testing across web applications
- ▶ Performed web service testing (SOAP/REST APIs) and root-cause analysis using log/trace file extraction and pattern recognition
- ▶ Led a team of 6 onsite/offshore engineers, coordinating technical assessments and effort estimation for delivery

Software QA Engineer

Jun 2013 – Dec 2013

Xenex Enterprises Inc., Toronto, ON

- ▶ Developed complex automated test suites using Selenium WebDriver for web and mobile apps, including cross-browser compatibility
- ▶ Designed data-driven test scenarios for validation of business-critical workflows in integrated environments

Jr. Software Engineer

Jan 2011 – Feb 2013

Information Mosaic / Miri Infotech, India

- ▶ Wrote SQL queries for backend data validation and created XSLT transformations for structured data processing
- ▶ Executed functional and regression testing, collaborating with development teams for rapid defect resolution

EDUCATION

B.E. – Computer Science & Engineering

Punjab Technical University, 2006–2010
